

Prof. Roger Steare

The Corporate Philosopher

Professor Roger Steare is The Corporate Philosopher and Visiting Professor in the Practice of Organisational Ethics at Cass Business School. Since 2008, he has been advising on leadership, culture and values with the Boards and senior executive teams of several major financial services firms and he is a Strategic Advisor on Organisational Culture and Integrity to EY.

Roger is the co-designer of MoralDNA, an objective diagnostic tool for culture and values. He invites people to stop and think in a compelling and inspiring, yet pragmatic way, and he helps people develop good thinking, listening and dialogue. The result? His clients are able to build empathic cultures where every customer, colleague and investor is truly valued as a human being. Where profit is no longer a dirty word. It is now the philosophy of sustainable prosperity for all.
