IOSCO Updates Information Repository for Central Clearing Requirements for

**OTC Derivatives** 

The International Organization of Securities Commissions (IOSCO) today released an update of its <u>information repository</u> for central clearing requirements for OTC derivatives, which provides

regulators and market participants with consolidated information on the clearing requirements of

different jurisdictions.

By providing this information, IOSCO seeks to assist authorities in their rule making and help

participants comply with the relevant regulations in the OTC derivatives market. The repository sets

out central clearing requirements on a product-by-product level, and any exemptions from them.

IOSCO first made the repository public in August 2014. The information in the repository will be

updated quarterly.

IOSCO welcomes suggestions from the public on how to improve the information repository and on

other areas that should be covered. Interested parties should write to clearingrepository@iosco.org.

NOTES TO THE EDITORS

IOSCO is the leading international policy forum for securities regulators and is recognized as the global standard setter for securities regulation. The organization's membership regulates more than 95% of the world's securities markets in more than 115 jurisdictions and it continues to expand.
