

**Resolution of the Presidents' Committee  
on Rules of Ethics of Intermediaries**  
*September 1989*

The Technical Committee is invited to establish a programme of work:

- a) to draft a set of principles for conduct of business regulation in the financial services that would attract general support among securities regulators;
  
- b) to identify specific issues in the area of conduct of business regulation where there would be advantage in early progress towards international convergence; and to propose how this might best be achieved.
