## **IOSCO OPEN LETTER TO G-20 SUMMIT**

The International Organization of Securities Commissions (IOSCO) today welcomed the efforts of the G-20 Heads of State to come together to address issues arising from the current financial crisis globally, and reinforced its willingness to assist in developing regulatory solutions.

In an [open letter](#) addressed to the G-20 forum signed by Jane Diplock, Christopher Cox and Guillermo Larrain, chairmen of IOSCO's Executive, Technical and Emerging Markets Committees respectively, IOSCO states that to resolve this current crisis, co-operation and coordination amongst financial regulators and policy makers, supported by the political will to make the necessary regulatory or legislative changes, are critical.

Additionally IOSCO offers the global reach and technical expertise necessary to assist policy makers develop and implement common global regulatory solutions in response to the current crisis in global capital markets.

IOSCO has already laid a solid foundation for a strong securities framework. The Objectives and Principles of Securities Regulation (IOSCO Principles) developed by IOSCO are recognised as the benchmarks for all securities markets, while IOSCO's Multilateral Memorandum of Understanding (MMoU) has been instrumental in strengthening cross-border enforcement cooperation and enabling regulators to exchange information.

The letter calls for a galvanising of political will to ensure that the IOSCO Principles are implemented in every country and that the legislative requirements to sign on to the MMoU are also implemented in every jurisdiction.

It notes that in the face of the present crisis it has become evident that regulatory gaps, particularly those posed by certain unregulated or under-regulated parts of the global market will need to be closed and IOSCO is the appropriate vehicle to achieve this. It is also increasingly clear that, while financial regulatory structures remain national, consistent global solutions are desired by many.

Building on its existing principles for high quality securities regulation, IOSCO is already examining ways to address some of the regulatory gaps highlighted by the crisis. This work includes:

- international financial reporting standards and the accountability of the standard setter to the community of national authorities responsible for reporting by public companies;
- building investor confidence, including through measures such as strengthening cross-border enforcement cooperation and addressing concerns about abusive short-selling in current market conditions;
- transparency in markets and disclosure with respect to all financial products; and
- establishing global norms for regulators of credit rating agencies through the IOSCO Code of Conduct Fundamentals for Credit Rating Agencies and promoting CRA compliance with rules through cooperative oversight and inspection.
