IOSCO Outlines its Priorities Regarding Data Gaps in the Asset Management Industry

The Board of the International Organization of Securities Commissions (IOSCO) today has issued a [public statement](#) outlining its priorities regarding data gaps in the asset management industry. IOSCO considers that more needs to be done to enhance the data collected in this sector and is analysing what data needs should be prioritised. To this end, IOSCO has identified a series of recommendations that will constitute its roadmap in this area. A key priority is to encourage IOSCO members to collect data with a view to better identify systemic risk.

Concurrently today, the Financial Stability Board (FSB) has published for public consultation [*Proposed Policy Recommendations to Address Structural Vulnerabilities from Asset Management Activities*](#) asking IOSCO to take forward the international work arising from many of these recommendations.
